

# Minimum Safety Inspection Requirements

Inspector must be a member of: SAMS, NAMS, US Surveyors, or ABYC standards accredited.

As appropriate, all systems need to be in compliance with:

- NFPA (National Fire Protection Association)
- USCG Title 33 & 46 CFR (Code of Federal Regulations)
- ABYC (American Boat & Yacht Council)
- The Gangplank Marina Rules & Regulations

## MINIMUM REQUIREMENTS

A Survey quality inspection of the following systems:

- AC & DC electrical systems (*condition of wiring, compliance with industry standards*)
- MSD – Marine Sanitation Device (*must be MSD Type III*)
- Liquid fuel heating & cooking systems (*compliance with industry standards*)
- Fire extinguishers and fire suppression systems.  
*Marina requires:*
  - *proper number for size of vessel*
  - *proper type for marine use*
  - *gauge in the green*
  - *mounted*
  - *accessible*
- Fuel systems (*condition of fuel lines, compliance with industry standards*)
- Smoke detector (*GPM requirement*)
- Carbon monoxide detector (*GPM requirement*)
- Presence of oil absorbent pad(s) in bilge (*GPM requirement – under oil pan of each engine and generator*)

## For Dockage at Gangplank, a safety inspection must be **“Dock Master Approved”**

A "Dock Master Approved" safety inspection is one that:

- (1) has been prepared as noted above
- (2) is no older than two years
- (3) has been submitted to the Dock Master for review
- (4) the Dock Master has reviewed and identified required repairs
- (5) the Slipholder has completed the identified required repairs and provided written evidence to the Dock Master of their completion (DM may choose to physically inspect the vessel), and
- (6) the Dock Master has put a final "OK" on

*Some surveyors (listed in no particular order) who have performed safety inspections for other Gangplank slipholders include, but are not limited to:*

**Cascade Corporation**
